

Proactive IT security and efficiency. 24/7 managed services tailored to your business needs.

A high-performance, secure IT infrastructure is crucial for business success. With our Managed Services, we ensure reliable 24/7 operations, relieve your teams, and create room for innovation. Benefit from scalable solutions that sustainably strengthen your IT, enabling you and your team to focus entirely on your core business.

YOUR CHALLENGES

Increasing IT complexity

Digitization, the cloud, and increasing network traffic demand continuous 24/7 monitoring and a secure operational management to ensure efficiency.

Shortage of skilled staff

Recruiting qualified IT experts for round-the-clock operations is becoming increasingly difficult, which may lead to bottlenecks and security risks.

Productivity losses and cost pressure

Malfunctions or anomalies that are not detected in time lead to downtime, productivity losses and unforeseeable costs.

Increasing security risks

Cyber threats are constantly increasing and require proactive, continuous monitoring, and rapid response to mitigate potential damage.

Flexibility and scalability

IT/ OT infrastructures must keep pace with growing business demands while ensuring consistent performance and reliability.

Constraints on innovation

Outdated systems and resource constraints impede the development of new IT/ OT solutions and slow down essential innovations.

OUR SOLUTION, YOUR BENEFITS

With our Global Managed Services, we take the pressure off your IT teams and ensure a stable, secure infrastructure around the clock. That's because we know that the success of your business depends on efficient, reliable IT operations.

OUR GLOBAL MANAGED SERVICES

Global Managed Network Services

We strengthen the collaboration between your teams by operating complex IT/ OT infrastructures and global networks 24/7.

LAN, WLAN, (SD-)WAN, Remote Access, NAC

Global Managed DDI Services

We efficiently manage your IP addresses and ensure the fail-safe operation of critical network services.

DNS, DHCP, IPAM (DDI)

Global Managed Security Services

We protect your networks from hackers and cyber attacks with comprehensive and holistic security solutions.

NGFW, DNS Sec, NAC, Internet Access Security, OT Security, E-Mail Security

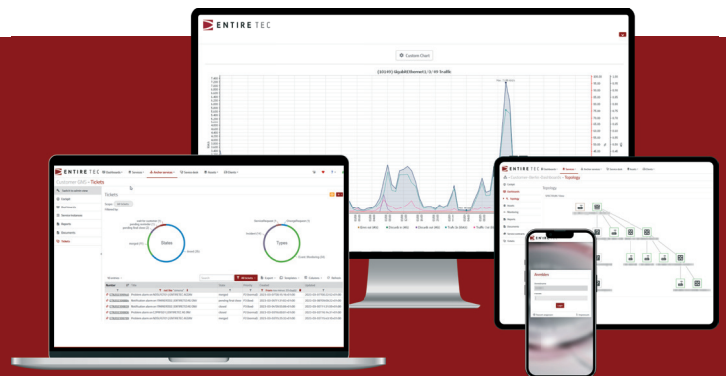

Global Network Visibility Services

We maximize availability, performance and security through 24/7 network monitoring and provide real-time data and cross-vendor asset management.

OUR SERVICE PORTAL PROVIDES VISIBILITY AT ALL LEVELS

All key network parameters and managed services metrics are consolidated, analyzed, and graphically presented on a single pane of glass. This provides you with a comprehensive, cross-vendor view of essential information – accessible anytime, anywhere, and in real time.

✓ Cutting-edge technology

Leverage the latest technologies, continuous strategic development, and our standardized Service Platform with global availability.

✓ 24x7 Operations

Our Network Operations Center (NOC) proactively monitors and manages your infrastructure 24/7, following ITIL processes and tailored SLAs.

✓ Highest service quality

Centralized service management, supported by dedicated service managers and uniform standards across all locations, ensure the highest quality of service.

✓ Extended resources

Enhance your IT team's expertise with our experienced specialists, allowing you to free up valuable resources for your business-critical tasks and initiatives.

✓ Full (cost) control

Reduce high capital expenditures and benefit from predictable operational costs, while maintaining full control over your IT infrastructure.

✓ 100% transparency

Via our Service Portal, you gain access to all service-related information, key performance metrics, and the important parameters of your network.

ENTIRETEC is a global Managed Services Provider and specialist in network and security technologies. Across industries, we support our clients' global business strategies with highly available and secure IT solutions, tailoring them into future-proof answers for digitalization, mobility, cloud, and IoT.
